Child Friendly Healthcare

WHEN MEDICINE ENCOUNTERS ART
The hospital’s environmental design is based on children’s liveliness and brilliance. Children of all ages visiting NTUCH found out it is full of interesting things and work in concert with the young hearts. All children and people who come to this healing environment feel happy, playful, relaxed, and peaceful flows moving around the atmosphere. Feeling the fun with artistic creations accompanies the children visiting NTUCH, these also comforts the parents’ mind with more ease.

FRUITFUL CREATIONS NURTURE THE HEALTHY FOREST THAT IS DEDICATED TO CHILDREN

NTUCH building’s exterior is designed as the “Sky Castle” for children. Interior uses vivid colors and shapes the beautiful forest with 16 pieces of public artwork scattering around, in and out. We also gather the vitality of social resources to spice up the whole environment with fun, interesting, innovative, creative, and cute articles. “Raising Children’s Playground” reconstructed the waiting area and playrooms to become the healing space with architectural creativity; “Family Resource Center” on the first floor provides children with reading and information about growing up healthy. The whole building has spread out more than 250 artworks and sculptures. The elevator door surrounded by “Wild Formosa” shows the beautiful animals and plants across Taiwan. NTUCH shapes the circumstances for children to create enjoyable, educational and enlightening experiences, making the medical visits so warm and lovely healing.
